PLAYSAN PLAYGROUNDS

Design, Security and Entertainment All in One

Playsan is a playground equipment manufacturer that combines an engineering perspective with the world of children.

From design to production, the company prioritizes quality, safety, and sustainability throughout every stage of the process. Today, Playsan products—the preferred choice in many countries—provide children with safe play areas while enhancing the aesthetic appeal of cities.

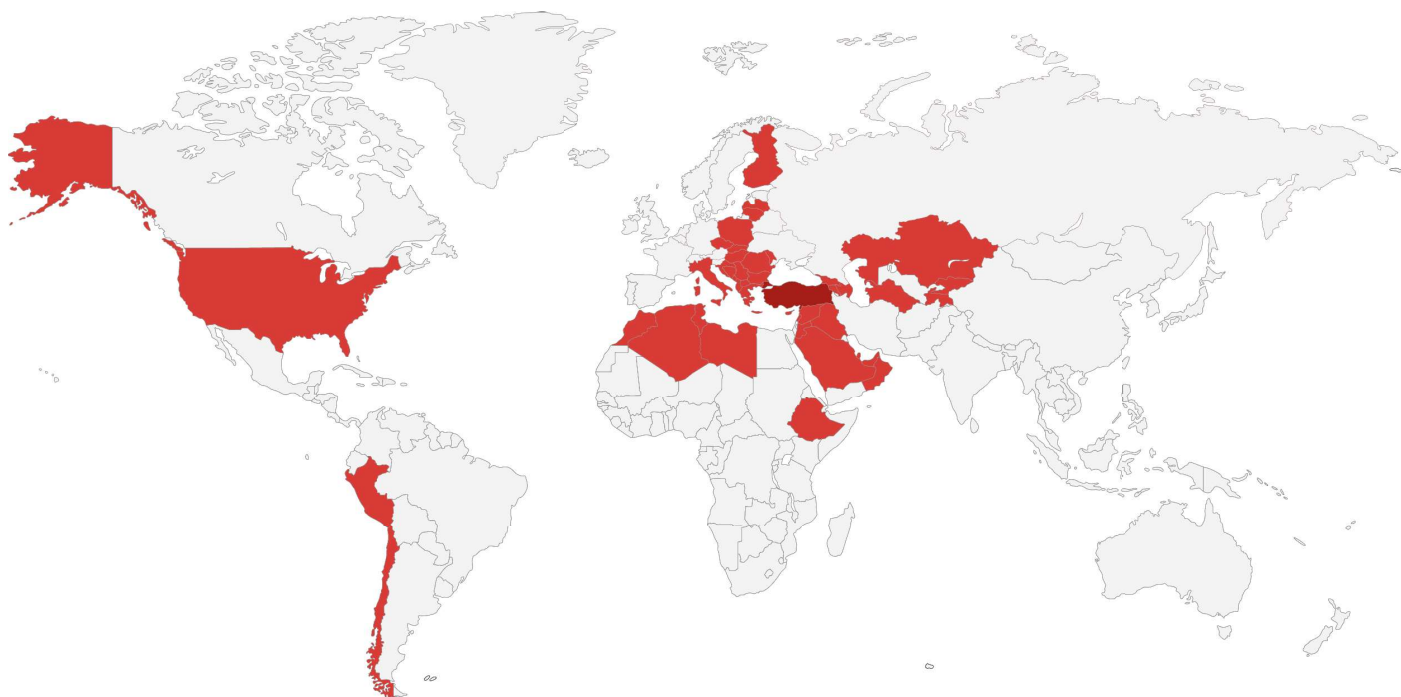

Each project is specially designed and meticulously crafted to nurture children's imagination. With its innovative solutions and eco-friendly materials, Playsan creates not only playgrounds but also living spaces that add value to communities.

By prioritizing safety and quality in every detail, it offers unforgettable experiences for both children and families.

Games that reach around the world

At Playsan, with our export capabilities extending to over 40 countries, we confidently deliver playground equipment to the world. The playgrounds we produce—tailored to different geographies while maintaining consistent quality, safety, and design standards—form the foundation of our global brand vision.

Production at International Standards

With our production philosophy centered on quality and safety, we develop our products in accordance with ISO and EN standards. We offer assurance with ISO 9001:2008, ISO 14001:2004, OHSAS 18001:2007, TS EN 1176 series, TS 12427, TS EN 16630 and TSEK certificates.

We manufacture according to international standards.

At Playsan, we conduct all our production processes in accordance with international quality, environmental, and occupational safety standards. Our products are developed with durability, safety, and long-lasting use in mind at every step, from design and production to material selection and final inspection.

With our approach that prioritizes children's safety in playgrounds, we produce solutions compliant with TS EN 1176 standards and offer durable and sustainable products suitable for outdoor conditions. Thanks to our quality management systems, we aim to maintain the same high standard in every project with stable production, controlled processes, and a reliable supply chain.

Our Production Stages

Laser Cutting

This process involves cutting the metal and sheet metal used in our products to the specified standard dimensions.

Sheet Metal Bending

This process involves shaping the sheet metal to be used in playground equipment using a press brake and appropriate dies at specific angles.

MIG Welding

It is a type of welding used to join different parts on metal workbenches.

Sandblasting

It is a surface cleaning method used to remove rust, dirt, grease, and welding slag from metal surfaces. This process is applied to all metal products.

Electrostatic Painting

All metals used in the playground equipment are coated with electrostatic powder paint. This process not only gives the products an attractive appearance but also ensures they remain protected against all weather conditions for many years.

Plastisol Coating

Plastisol coating is used to soften sharp surfaces that children may come into contact with, protect metals from corrosion, and prevent floors from becoming slippery.

Raw Material Line

Pure polyethylene raw material undergoes specific processing steps. Additives and pigments that prevent color fading and provide protection against UV rays are added, and the mixture is homogenized in a mixer to make it ready for production.

Plastic Material Production (Rotational Molding)

The raw materials, once prepared for production, are poured into molds and baked under controlled conditions in rotary kilns to produce the final product.

Router Processing

This involves engraving, shaping, creating reliefs, and etching on materials such as HPL and HDPE.

Woodworking

In our woodworking processes, products such as gazebos, benches, and picnic tables are crafted with a focus on durability and aesthetics. The selected wood materials are shaped using modern woodworking techniques.

Rope and Connection Systems

Rope and Connection Systems; High-strength ropes and connectors are secured using a hydraulic press and joined in a way that cannot be undone.

Shipment

Our products are securely packaged and meticulously prepared throughout the shipping process to ensure they arrive without damage. Supported by a well-structured logistics system, all deliveries are carried out on time and in complete quantities.

It's Time for Sports!

Our fitness equipment is designed to the highest quality standards to support strength, endurance, and fitness gains.

With our modern and durable solutions, we transform spaces into active living areas. Every product we offer at Playsan ensures safe, functional, and long-lasting use.

Come on...
It's time to get moving.
It's time to **work out**.
